

Refresher Course for Responsible Person for Hazardous Paint Management

Presented by

Fred Salome

B.Sc. (Hon.), ACA Corrosion Technologist
NACE Certified Coating Inspector (Marine)
NACE Protective Coating Specialist

*Updating of Previous Certification for People Dealing with
the Management of Lead and Other Hazardous Paints*

**This course has received Australian Paint Approval Scheme endorsement
for PCCP Class 5 and Class 6 Accreditation**

REFRESHER COURSE

CTI have developed this Responsible Person for Hazardous Paint Management Refresher Course to meet the PCCP Class 5 and Class 6 accreditation requirement for 2-yearly updates for Responsible Person training.

We will provide this training to anyone who has completed our full 2-day Responsible Person course at any time since its inception in 1998. We can also refresh people originally accredited by other PCCP-recognised training providers if proof of such accreditation is provided with the course registration application form.

The course runs over a single day, commencing at 8.30 am and typically completing mid-afternoon.

REFRESHER COURSE CONTENT

The refresher course is specifically designed to review and update the material presented in the full 2-day course. It will review the main principles and controls for hazardous paint management, and provide updates on applicable regulatory changes and settings in the various jurisdictions within Australia.

The course has been comprehensively revised and updated following the re-issuing in late 2017 of AS/NZS 4361 Parts 1 and 2.

REGISTRATION FEES

The registration fee for the course is currently set at \$565 per person (plus GST) for courses held in Sydney.

This includes an updated copy of the course manual written by the Fred Salome and Professor Brian Gulson. Morning tea and lunch are also provided.
